

USB Dongle Support

To ensure that your router includes the most up to date modem support, please check to make sure it is running the latest firmware. The list below indicates USB modems that have been tested for compatibility. If you have a modem that is not in this list then it means we don't have data but it's still a possibility that it is supported, especially if similar models by the same

The mobile operators (Vodafone, EE, O2, 3 etc.) continuously introduce new modems, so additional modem support is added frequently to current models. If you have a modem that you find isn't yet supported, it is possible to obtain logs for our engineers to assess. Please contact support if you find a modem that is not supported.
