

MailPlus License

The MailPlus and MailPlus Server packages allow your business to set up a secure, reliable, and private mail server, while giving your employees a modern mail client to receive and send messages. Furthermore, MailPlus and MailPlus Server are packages that can be installed on your Synology NAS, so there's no need to rely on third-party services. Best of all, MailPlus comes with 5 free accounts and offers a cost-effective licensing plan for you.

Highlights

- A secure, private, and cost effective email solution
- High-availability architecture maximizes the service uptime
- Seamless integration with LDAP server or Windows AD domain for your company's shared address book
- Specially designed algorithm for high speed full-text search
- Beautifully designed and intuitive mail clients let you manage emails efficiently
- Cross-platform support on web client and Android™/iOS with dedicated mobile apps

Licensing Plan

Synology MailPlus comes with **5 free email accounts** and allows you to add more accounts with additional purchased licenses. We provide two kinds of license packs to suit your needs: **5** or **20** units of email accounts, both with **perpetual validity**. The included licenses can only be applied to one Synology NAS, and **cannot be migrated** to another Synology NAS once activated.

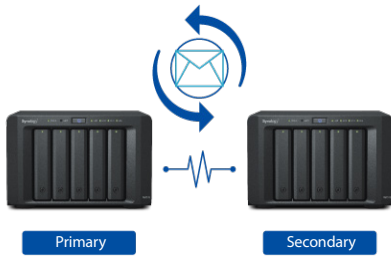

In addition, email aliases are not considered as email accounts and therefore do not require any license for use.

High-Availability Architecture

No additional fee will be charged for the high-availability support in MailPlus, and one cluster includes **10 free mail accounts** by default. To have more licensed email accounts for use, you need to apply purchased license keys from Synology. For example, if you want to enable 25 email accounts in the high-availability cluster, then 15 additional licenses are needed.

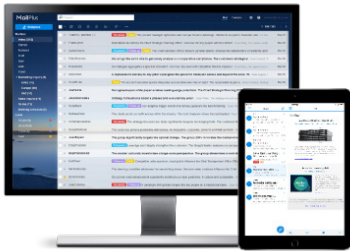

MailPlus Web Client and Mobile App

MailPlus web client and its mobile app (available for Android™ and iOS) do not charge fees for use, and they will be updated regularly for free with MailPlus Server.

MailPlus Server

The MailPlus Server package transforms your Synology NAS into a powerful, resilient mail server with high-availability design, spam filters, malware protection, ensuring your company's communications are smooth, well-protected, and available at all times.

Web Client/Mobile App

MailPlus provides cross-platform support on your web browser and mobile devices. Organize with labels, sort using filters, and search emails in a breeze.

License Activation and Account Management

To apply purchased license keys, you will have to log in to the Synology NAS as the administrator. Then, open MailPlus Server and go to **License** to apply the keys (Internet connection required). One license key can only be applied to one MailPlus supported Synology NAS.

If you want to activate or deactivate email accounts, go to **Account** for management.

To check all your activated licenses, please log in to your Synology Account at account.synology.com.

SYNOLOGY INC.

Synology is dedicated to taking full advantage of the latest technologies to bring businesses and home users reliable and affordable ways to centralize data storage, simplify data backup, share and sync files across different platforms, and access data on-the-go.
