

Clavister Eagle Series – feature-rich, entry-level firewall, robust functionality

The Clavister Eagle Series is a set of network security products designed for remote access and branch office applications, which requires excellent performance, world-class design and innovative functionality.

The Clavister E7 is perfectly suited as a remote access firewall or as a branch office firewall, offering great performance and connectivity. The Clavister E7 offers great connectivity in a small, beautifully designed enclosure. It is full of capabilities, yet small enough to keep on the desktop. And a design so stunning, you simply want to share it with others.

Key Features

Powerful firewall

- The Clavister E7 packs enough firewall power to cover a wide range of applications, including IPsec/SSL VPN tunnels, Application Control, advanced routing and firewall performances up to 400 Mbps.

Support for Clavister Security Subscription

- Being secure means to have it all. Clavister E7 supports Clavister Security Subscription, which include all our product and support services. With Clavister Security Subscription your installation is always secure and fully served.

Key Benefits

Easy to use, deploy and manage

- The Clavister E7 is a easy to use, deploy and manage. Setting up remote access or a branch office is simply plug and play. With the cost-effective Clavister E7 Remote, you get a lot of network security power at an attractive price point.

Unified Centralized Management

- It is important for any organization to be able to manage remote access devices and branch offices. Clavister E7 is easily managed using Clavister InControl, our centralized management system, making it easy to keep a unified security model across your organization, and keeping management overhead to a bare minimum.
