

Billion CMS Central Management System

Billion CMS is a standalone centralized management system that allows service providers and system integrators to monitor the status and performance of the terminals and remotely manage Billion devices.

Maximize the operational efficiency

Saving the cost for on site support

Streamline deployment & centralize maintenance

Billion CMS Central Management System

Designed for service provider and system integrator to remotely control and manage Billion 5G/LTE routers, M2M routers, and VDSL/ADSL business routers, enabling users to minimize deployment, lower supporting service expenses, and maximize operational efficiency.
