

NetWall 300 series

Clavister's latest addition to its line of Next Generation Firewalls with state-of-the-art SD-WAN capabilities

Clavister's NetWall 300 series offers next-generation firewall (NGFW) capabilities for SMBs to mid-sized enterprises, ideal for home or distributed office deployments designed to prevent cyber-attacks, reduce complexity, and lower your costs.

Clavister NetWall 300 series architecture is engineered to deliver enhanced network visibility, protection, and performance to help IT managers and system administrators to address some of the greatest challenges facing networks today. These NGFWs address growing breaches and protects against emerging threats with industry-leading Secure SD-WAN in a simple, affordable, and flexible to deploy appliance.

Highlights

- Easy-to-deploy & flexible SD-WAN spokes
- Zero-Touch Provisioning
- Fully enabled Next Generation Firewall feature-set
- SSL VPN to support secure remote working with Windows, macOS and iOS clients included
- Simple to deploy new firewalls using custom configuration templates with centralized management tool
- Included with cloud analytics tools to provide real-time troubleshooting and overview dashboards
- Unique CyberSecurity Score for simplified actionable security analytics
- Application Visibility & Control with high granularity and support for over 3000 unique applications
- Integrated Intrusion Detection/Protection System with real-time updates.
- Botnet and denial of service (Dos) protection through continuous updated IP Reputation feeds

The release of NetWall 300 series expands Clavister's security ability to deliver enhanced security capabilities across SD-WAN and NGFW solutions, suitable for public sector deployments.

Solution Deployment Scenario

Next Generation Firewall (NGFW)

- Reduce the complexity and maximize your ROI by integrating threat protection security capabilities into a single high-performance network security appliance
- Empowered by Clavister's eco-system, it provides full visibility into users, devices, applications across the entire attack surface and consistent security policy enforcement
- Protect against network exploitable vulnerabilities with industry validated IPS (Intrusion Prevention System) that offers low latency and optimized network performance

Secure SD-WAN

- Ideal as SD-WAN spoke with simplified deployment and maintenance routines, while saving cost at the same time
- Dual WAN link, route failover and traffic prioritization and shaping use-cases with application detection supporting over 3000 unique apps
- Strong security posture with integrated security capabilities and real-time threat protection
- Centralized management with auto-provisioning, analytics, and reporting to reduce day-to-day management, increase productivity and scale your security without scaling your team at no extra cost

Security Use Cases

Connect	
	Reliable Secure VPN Connecting branch offices and remote locations securely and cost effectively
	Routing & Load Balancing Avoid downtime and secure business continuity with redundancy
	Secure Network Zones Network segmentation to protect company's digital assets
	Server Load Balancing Simplifying scaling and allowing preventive maintenance
	Secure Remote Access Empowering remote workers and devices with flexible secure access
Protect	
	Firewalling Network Firewalling securing IT resources and users
	Network Attack Protection Intrusion detection and prevention system and Denial of Service protection
	Antivirus Scanning Streaming scanning of attachments in mail, web and file downloads for malicious content
Prevent	
	Active Traffic Optimisation Traffic prioritisation securing preferred use of resources
	Captive Portal Authentication Integration with Active Directory and 2FA procedures for open network access
	Botnet Blocking Block outgoing and incoming traffic through IP reputation
	Web Content Filtering Restrict access to inappropriate content and high risk sites
	Application Visibility & Control Control applications and user behaviour to optimize network resource usage

Products & Services included	
	Hardware replacement Traffic prioritisation securing preferred use of resources
	24/7 Support (online & by phone) Integration with Active Directory and 2FA procedures for open network access
	Centralized management with Clavister InControl
	Clavister OneConnect SSL VPN Client for Windows and macOS
	Security analytics Analyze your security thoroughly with Clavister InCenter Cloud
	Software upgrades New features & maintenance releases
	InCenter on-premises Optional Clavister InCenter on-premises installation
	CyberSecurity Score For simplified actionable analytics
	Signature updates From eco system partners for all the protect and prevent use-cases

Clavister Security Eco-System

Clavister works with many of the world's leading technology companies to improve manageability, strengthen security and ensure faster and more successful deployments. Integrated into the Clavister Next Generation Firewall is an ecosystem with the best of breed components empowering key use-cases named in this paper. Feeds are updated in real-time through the Clavister provisioning network to ensure the latest signatures are deployed for optimal protection.

¹ For hardware appliances

² Clavister InControl & InCenter Cloud

³ New features and maintenance

⁴ Using Clavister NetEye (Virtual Version included for free, hardware at cost)

Clavister NetWall 300 series Hardware Specifications

Feature	Specification
Ethernet Ports (on board)	6 x 1GbE (RJ45), 2 x 1GbE (SFP)
Form-factor	Desktop
Dimensions (HxWxD)	44 mm x 270 mm x 160 mm (1.73 in x 10.62 in x 6.29 in)
Rack mountable	Yes
Power Supply - AC	100-240VAC, 50-60 Hz

Technical Features	NetWall 310	NetWall 340
IPv4 Firewall Throughput 1518 byte , UDP)	4 Gbps	8 Gbps
Concurrent Connections	500 000	1 000 000
IPsec VPN Throughput (1420 byte, UDP)	1000 Mbps	2000 Mbps
Gateway-to-Gateway or Roaming IPsec VPN Tunnels	500	1000
VLANs	256	512
Virtual Routes	20	50

Central Management and Control

All Clavister appliances can be administered individually via a web interface, but a license to use the central management Clavister InControl is included. The solution offer zero-touch deployment, simplified ways to provision and manage a Secure SD-WAN deployment and firmware upgrade management capacities.

Real-Time Cloud Analytics

Clavister InCenter enables IT administrators to gain insight into their networks. Clavister In Center provides all the user stories including forensics with log search, dash boarding and reporting as well as health monitoring. A hosted version of Clavister InCenter Cloud is included with each Security Subscription, and alternatively InCenter is available for on-premises deployment as well.
